Orthopedic Surgery & Sports Medicine

## GOLDBERG NAMED ONE OF AMERICA'S LEADING DOCTORS BY NEWSWEEK AND STATISTA

Collier County's only shoulder surgeon among nation's top 200, recognized for leadership in orthopedic innovation and outcomes

Naples, FL — Newsweek, in partnership with global data analytics firm Statista, has named Steven S. Goldberg, MD, P.L., among America's Leading Doctors 2025 in the specialty of Shoulder Surgery. Dr. Goldberg is the only shoulder surgeon in Collier County to earn this national distinction, placing him among the top 200 orthopedic specialists in the country recognized for excellence in patient care, surgical outcomes, and innovation.

This recognition highlights Dr. Goldberg's two decades of leadership in advancing shoulder replacement surgery, orthopedic implant design, and minimally invasive surgical techniques that enhance recovery and long-term joint function.

"It's an incredible honor to be recognized among the nation's leading shoulder surgeons," said Dr. Steven Goldberg. "Receiving this distinction reflects our team's ongoing commitment to excellence, innovation, and compassionate care for every patient we treat."

Unlike paid listings, Newsweek's America's Leading Doctors ranking is based on independent, data-driven research conducted by Statista. The methodology includes analysis of Medicare and commercial insurance claims, peer recommendations from tens of thousands of medical professionals, quality-of-care assessments, and board certification verification. The result is an objective, evidence-based list of the nation's most respected doctors across 15 specialties, including orthopedics, cardiothoracic surgery, sports medicine, and vascular surgery.

A board-certified orthopedic surgeon specializing exclusively in shoulder surgery, Dr. Goldberg completed his medical training at Columbia University and advanced fellowship training in Shoulder, Elbow, and Sports Medicine at New York Orthopaedic Hospital. During his 20-year career, he has become a nationally recognized leader in shoulder replacement and arthroscopic procedures, known for developing innovative, minimally invasive techniques that restore shoulder function and accelerate recovery.

In addition to his clinical practice, Dr. Goldberg is the founder and Chief Medical Officer of Catalyst OrthoScience, a Naples-based medical device company dedicated to improving shoulder replacement technology through innovative implant design. His innovations and multiple U.S. patents led him to start Catalyst OrthoScience, therefore resulting in significant advancements in shoulder replacement systems, further establishing him as a leader in orthopedic innovation.

Through his Naples-based private practice, Steven S. Goldberg, MD, P.L., Dr. Goldberg provides advanced, personalized shoulder care for patients across Southwest Florida and beyond. He offers both surgical and non-surgical treatments for shoulder arthritis, rotator cuff tears, and complex joint injuries, with a focus on precision techniques that deliver lasting mobility, strength, and comfort. His dedication to research, teaching, and device development continues to shape best practices in shoulder surgery worldwide.

"Earning this recognition reinforces our commitment to offering world-class shoulder care right here in our community," Dr. Goldberg said. "It's a reflection of the dedication and innovation that drive our entire team every day."
